

intu[®]

innovative blinds for modern windows

no holes, no screws, just style!

beautifully integrated blinds

Your home is a reflection of you, so we know you want to dress your windows with style whilst gaining maximum shading from the sun. You also want to open and close your windows and doors without damaging your blinds.

INTU® blinds complement your windows in both design and function, making them the intelligent choice for today's homes. Having no free hanging cord loops, the safety features unique to all of the INTU® range are completely integral to the blinds.

intu® blinds

- Neat and simple control options eliminate the need for free-hanging cord loops, making it one of the safest blinds available.
- Designed to fully integrate with all modern windows including 'tilt and turn' and glazed doors.
- Unique design fits neatly into the bead of your windows and doors.
- 'Click-to-Fit' system blinds push into the brackets without using screws.
- The patented no drill bracket system means blinds can be clipped in place in minutes.
- Easy to operate.
- Choice of Roller fabric, Venetian slat, Pleated and Cellular fabric, in an extensive range of colours, designs and finishes.

ideal for conservatories

INTU® Roller, Venetian, Pleated & Cellular blinds

INTU® blinds are ideal for conservatories, glazed doors and tilt and turn windows.

They fit neatly into the window bead minimising light gaps and giving you exceptional control of solar heat and the amount of light coming into the room.

A unique tension system prevents the blind from rattling against the glass when you open your window or door. Allowing up to 15 degrees of tilt, you can operate your window or door handles easily with the blind in place. To raise or lower your blind, simply move the bottomrail up or down to any position.

'Click to Fit'

The specially developed 'Click to Fit' system means blinds now click straight onto the brackets without screws, making INTU® blinds even faster and easier to install.

Available as Roller, Venetian, Pleated and Cellular blinds, you can choose from a wide variety of colour options in each.

INTU® flexible solutions

INTU® provides a range of installation options to fit most sizes of modern windows including larger windows and longer drops.

Your retailer can advise you on the best solution for your home, conservatory or office.

The INTU® Roller blind

the latest exciting addition to the INTU® range

INTU® Roller is the ultimate easy-to-install blind system, designed to integrate beautifully with most window systems, including conservatories, tilt and turn windows and glazed doors.

The unique design of the INTU® Roller low profile fascia gives a sleek, modern appearance, taking the popular roller blind to a new level.

Unique INTU® roller fascia

INTU® streamlined bottom bar

INTU® discreet fascia

The streamlined bottomrail gives perfect control. Easily locking into position at any point, INTU® Roller also provides outstanding energy efficiency and room darkening options with blockout, solar reflective and fire retardant fabrics. The INTU® Roller is particularly 'child safe' eliminating all hanging cord loops or chains.

- Designed with safety in mind, INTU® Roller eliminates the need for cords, loops and chains.
- No drilling, No screws, No holes. Installation is simplicity itself using "INTU® Click-to-Fit".
- Available in a wide range of Roller Fabrics including plains and prints, reflective and blackout.
- The simple "Tilt and Raise" control makes INTU® Roller a smooth addition to your window.
- The soft curved fascia fits discreetly into the frame of the window reducing light and heat gaps, improving energy efficiency and saving you money!

extensive roller fabric choice

pleated and  CELLULAR

INTU® Cellular is a unique honeycomb fabric that gives you superior insulation with a modern sleek look.

- No need for cord loops, making it especially safe for children.
- Creates a beautifully soft diffused light in the room.
- Unique construction means that there are no visible holes in the fabric giving a smooth modern look.
- Each “honeycomb cell” in the fabric traps air, keeping your room cooler in summer and warmer in winter.
- Light but extremely strong structure that holds its shape and always looks great.
- Ideal for all modern windows including ‘tilt and turn’ and glazed doors.
- Duo-tone colour options are also available.
- Blackout versions are available, which very effectively keep light out and are especially suitable for children’s bedrooms.

intu[®] multizone blinds

Multizone is a feature for any INTU[®] Pleated or Cellular blind, providing limitless options for height control and privacy.

- The innovative use of two adjustable rails allows the blind to be moved from the top down as well as from the bottom upwards.
- The blind can be set at the exact position you require, to provide the shade that you want whilst still allowing light into the room.
- Especially suitable for providing privacy in ground floor and basement flats, and shade for computer screens.
- Available on all INTU[®] Pleated and Cellular fabrics and ideal for homes, conservatories and offices.
- Two adjustable headrails allow for the blind to be positioned multi-directionally, letting light in but still maintaining privacy.

no holes, no screws, just style!

style with peace of mind

Safety in Mind encourages the use of simple features to help make window blinds safer, particularly for families with young children or pets, and the elderly.

The INTU® systems neat and simple control options eliminate unnecessary free hanging cord loops, creating one of the safest blinds you can buy.
