

## Solar panel installation

- A pack of double-sided adhesive strips is supplied with Solar Pack. The strips are designed to be placed on the outer edge of the panel and then mounted to the inside of the window pane.
- A bracket pack is available for installations that may require an alternative mounting solution.
- Once the panel is mounted and the system fully installed, the bottom bar of the blind should be set so that it conceals the solar panel when the blind is fully raised.
- Window type: Single or double glazed units.  
Glass with light transmission as low as 65%
- Avoid: Windows with films or similar 'barriers' to light  
Windows with trees or vegetation blocking the light
