Profile stabilizer (position should be under or nearby the Clip)

All dimensions in millimetre!

Attention: It is recommended to mount the clip with the flap forward (into the room). The clip can **only** be mounted with the flap toward the window or the pane respectively, in case the distance to the rail is **min. 7 mm**.

>7 mm

Ceiling mounting with Clip

Place the profile in the back edge of the clip and push the front of the profile upwards (till it clicks in).
